

Technical Bulletin DVS 2904

Controls, power components and transformers for resistance welding

Technical Committee of the DVS

Working Group V 3 "Resistance Welding"

Subgroup V 3.6 "Measuring and process control"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document.

Content:

1.	Aim of the Technical Bulletin	5
2.	Introduction	
3.	Tasks of the welding unit components	6
3.1.	Welding control	6
3.2.	Power unit	6
3.3.	Transformer	6
3.4.	Energy system	6
3.5.	Peripheral equipment	7
3.6.	Sensors	7
4.	Welding unit component versions	7
4.1.	Conventional welding current control	7
4.2.	Control via PLC	8
4.2.1.	System control via PLC	9
4.2.2.	Welding sequence control via PLC	9
4.2.3.	Examples of the use of welding sequence controls via PLC	10
4.3.	Power unit	12
4.4.	Transformer	12
4.5.	Energy system	12
4.6.	Peripheral equipment	13
4.7.	Sensors	13
5.	Examples of the use of welding controls	14
5.1.	Robotic welding cell	14
5.2.	Stationary projection welding unit	16
5.3.	Hand-held welding gun	17
5.4.	Small part welding unit	18
6.	Welding control, power unit and transformer functions with the different current forms	19
6.1.	Line-commutated alternating current	20
6.1.1.	Welding current adjustment through phase shift	21
6.1.2.	Delayed first half-wave	23
6.1.3.	Discharge resistance and damping resistance	23
6.2.	Single-phase direct current	23
6.3.	Three-phase direct current	24
6.4.	Frequency converter	26
6.5.	Medium frequency and high frequency inverters	27
6.5.1.	Structure	27
6.5.2.	Pulse width modulation	28
6.5.3.	Parallel connection of power units	29
6.5.4.	Discharge of the intermediate circuit	29
6.6.	Transistorized welding power supply	29
6.7.	Capacitor discharge welding	30
7.	Welding transformer	32
7.1.	Welding transformers for thyristor controls	33
7.2.	Welding transformers for inverter systems	34
7.3.	Pulse transformer for capacitor discharge applications	35
8.	Cooling	35
