

Technical Bulletin DVS 1401

Design recommendations for bonding additively
manufactured components

Technical Committee of the DVS
Working Group V 12 “Additive Manufacturing”

Inhalt

1.	Scope.....	3
1.1.	Table of abbreviations	3
2.	Recommendations for Joining Zone Design with Grid Structures.....	5
2.1.	Grid topology.....	6
2.2.	Sizing	8
2.3.	Grid dimensioning	8
2.4.	Dimensioning with regard to production restrictions	9
2.5.	Process parameters	10
2.6.	General production parameters	10
2.7.	Multi-Material Manufacturing	11
2.8.	Adhesive bonding.....	11
3.	Validation of adhesive joints	12
3.1.	Quasi-static testing of load under tension	13
4.	Alignment on the print plane.....	13
5.	Cleaning the adhesive surface	14
6.	Derivation of rules and their interactions for bonding additively manufactured components on the basis of experimental investigations	14
6.1.	Interactions of individual measures.....	15
6.2.	Exemplary application of the rules using an academic example	19
7.	Lattice structure for adhesive bonding with plastics that are difficult to glue.....	21
8.	Publications	22
8.1.	Regulations.....	22
8.2.	Literature	22
8.3.	Further reading	22

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – German Welding Society and those participating in the drawing up of the document.

This text is aimed equally at men and women. However, to improve readability, the text does not use the masculine/feminine form throughout and only the masculine form is used.
