Technical Code DVS 2244

Hot Gas Series Welding (WS) of Thermoplastics

Technical Committee of the DVS

Working Group W 4 “Joining of Plastics”

Subgroup W 4.15 “Hot Gas Series Welding”

Table of contents

1.	Scope.....	4
2.	Process description	4
2.1.	Differentiation from other convective methods	4
2.2.	Procedure	4
3.	Heating mechanism	5
4.	Machine technology.....	6
4.1.	Types and designs.....	6
4.2.	Drives.....	6
4.3.	Gas supply	7
4.4.	Suction	7
4.5.	Occupational safety.....	7
5.	Hot Gas Tool.....	7
5.1.	Heating plate	8
5.2.	Heat exchanger plate	8
5.3.	Outlet element	9
5.3.1.	Tube Outlet	9
5.3.2.	Slotted air vent	9
5.3.3.	Additively manufactured air vents	10
6.	Mounting tools	11
6.1.	Basic structure	11
6.2.	Sensors	11
6.3.	Thermal design.....	11
7.	Material influences	11
7.1.	Thermal Material Behaviour.....	12
7.2.	Rheological Material Behaviour.....	12
7.3.	Thermo-oxidative material behaviour.....	12
8.	Structural design of the joining parts	12
9.	Welding allowance.....	13
9.1.	Clearance for melt expulsion/weld bead.....	13
9.2.	Butt seam basic shapes.....	14
9.3.	Joining geometry with concealed weld seam Modified butt weld	15
10.	Machine parameters and process variables.....	15
11.	Quality requirements for the joining parts.....	19
12.	Quality assurance measures	20
12.1.	Monitoring of the welding process	20
12.1.1.	Force measurement.....	20
12.1.2.	Displacement measurement.....	20

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – German Welding Society and those participating in the drawing up of the document.

This text is aimed equally at men and women. However, to improve readability, the text does not use the masculine/feminine form throughout and only the masculine form is used.
