Technical Code DVS 2203-6 supplement 1

Testing of joints between polymeric materials - Torsion shear test, radial peel test and linear shear test for sleeve welding with incorporated electric heating element and heated tool sleeve welded joints

DVS, Technical Committee, Working Group "Joining of Plastics"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration as an important source of information is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the Deutscher Verband für Schweißen und verwandte Verfahren e. V., and those participating in the drawing up of the document.

Content:

1. **Scope**
2. **Specimen extraction**
3. **Test procedure**
 - 3.1. Manual combined torsion shear test (TSV)
 - 3.2. Radial peel test (RSV)
 - 3.3. Mechanical linear shear test (LSV)
4. **Assessment**
5. **Test report**
6. **References**
 - 6.1. Regulations
7. **Appendix**
 - 7.1. Further information
 - 7.2. Example test report
